Cataract Information

Insight Eye Clinic

## About Cataract

Cataract, or Safed Motia, is a clouding of the natural lens. The most common cause of cataract is age.

Initial symptoms of cataract include a reduction in vision, glare at night, difficulty in reading and in recognizing people. However, these symptoms are variable, and the best way to know whether you have cataract is to consult your eye specialist.

In the early stages, surgery may not be required, and vision might be improved by using spectacles. However, as the cataract progresses and starts to interfere with day to day functioning, surgical treatment becomes necessary.

It is important to get treatment for cataract at the correct stage of disease, because as cataract progresses, the risk of complications also rises.

## About Cataract Surgery

Modern cataract surgery is a highly sophisticated procedure. At Insight Eye Clinic, we take pride in the fact that our surgeons are very skilled, and have more than 15 years of experience in cataract surgery.

The surgery is done under surface anaesthesia, a technique that does not need any injections in or around the eye.

For most patients, the actual surgery takes about 10-15 minutes. You may leave immediately after the surgery, and a follow-up examination is usually scheduled for the next day.

Instructions about things to do or avoid before and after surgery will be provided to you as a printed document. In addition, staff members will help you with any questions you might have. Please feel free to ask your doctor anything related to your surgery.

## Why choose Insight?

1. Modern, state-of-the-art operation theatre with the latest equipment.
2. MICS enabled phaco machine.
3. Highly experienced, gentle and skilled surgeons.
4. The 'No Injection' technique is used for cataract surgery. Eyes are anesthetized using simple eyedrops.
5. Warm, caring and well-trained staff.
6. Accurate assessment of surgical need. We do not perform unnecessary surgery.
7. Full anaesthesia backup, especially important for heart patients.
8. DIO assisted IOL power calculations for enhanced accuracy at no extra cost.
9. The best quality, branded lenses used. Every patient gets full details of the lens implanted.
10. Fair and uniform price structure with no hidden costs.
11. We maintain all your medical records.
12. A continuous, in-house surgical outcomes assessment program ensures consistent good results for the patients.
13. Registered with the Delhi Government.
14. Arrangement for both cashless treatment and reimbursement of bills, for private insurance as well as CGHS, DGEHS etc.
15. A reputation for excellence since we opened in 2002.
